

Dear FCC, K-Love has brought to my attention that LPFM may be given a priority over the FM translator service which can eliminate my K-Love music. Please do not do this. They are always informing me about events local to my community as well as keeping a national perspective as it can effect our community. I really appreciate all that they do. They are very positive and I have never heard anything local that can meet thier quality while at the same time provide information that pertains to me in my local community. I also appreciate how you are trying to make things better & hope that this brief comment can let you know that K-love is doing a great service to my community. Thank you for considering my comment.
Sincerely, Michael Tuccillo
